## ABOUT ME

I am a self-motivated and driven individual searching for ways to improve every day. I enjoy learning both from others and on my own. My positivity and good communication skills make me a great team player. Critical and abstract thinking are my strong suit, giving me the ability to problem-solve and add creative insight. Because feedback is of great importance to me, I welcome any advice and constructive criticism. As a result, I am easy to coach and very approachable. Because of my willingness to adapt, I can effectively learn new technologies within fast-paced environments.

## RELEVANT EXPERIENCE

### REVIEWMYSONG (<http://beta.reviewmysong.com>)

Junior Developer, October 2016 - Present

- Collaborated in the design and implementation of a notification system using Firebase, RESTful APIs, AngularJS, NodeJS, and PHP among others
- Continuing collaboration in the platform's overall development, including fixing bugs, tackling issues, and implementing future features
- Working within a collaborative environment that follows agile practices along with the use of collaboration tools including JIRA, git, and GitHub

### SHOWUP, JUNTOS INC ([Cross-Platform App & Marketing Site](#))

Intern, June - October 2016

- Continuing collaboration in converting the app from Ionic V1 to Ionic V2 frameworks using Angular2, TypeScript, & FireBase among others
- Made significant contributions for <http://Showup.events> (official marketing site) by adding parallax background animations and implementing a subscription feature using MailChimp's RESTful API (v3)
- Worked in a collaborative environment using Trello, git, and GitHub with exposure to sprints and developmental cycles

### MTN-REV ([Full-Stack Web Application](#))

Personal Project, April - May 2016

- Concept site give users information and reviews of ski mountain resorts and post comments, pictures, and even their own reviews
- Full-Stack application developed with MongoDB, ExpressJS, and NodeJS
- Current and new accounts must be authenticated and authorized during logging in, logging out, and registering.
- Follows CRUD and RESTful practices
